Wall Street, Oct. 31. Considering the adverse developments of the day, the local stock market was remarkably strong, with alvances even be ing scored by the much despised industrial common stocks. News of the severe reouth Africa threw a damper over the London market, a sharp decline in Amer-ican stocks there being followed by heavy sales in this market. This selling by arbitrage brokers for foreign account approximated 35,000 shares of stock. Atmost before the local traders had begun to reallz how strong the pressure was from the other side, there was another spectacular advance in call money rates, with 35 per cent being the highest quotation and 6 per cent the lowest and closing. That this rise was largely the result of manipulation is very generally believed, even by con servative interests. As the London market will be closed to-morrow, owing to a bank holiday, this influence will be lacking it

to-morrow's trading.

From the sharp declines which were scored at the opening and during the first iour of trading there were very substan-ial rallies, which occurred in all depart-nents of the market. Rallway stocks, par-icularly those which are international in character, recovered very rapidly as a rule

STRONG INTERESTS HOLD MARKET STEADY.

The stubborn resistance shown by the stock market to the depressing incidents of the day was a revelation even to the bullish speculators. That the marking up of call loans to 35 per cent was largely due to manipulation is a self-evident fact. One of the leading local banking institutions called loans extensively on Monday, and to-day made new ones to the extent of \$750,000 at 20 per cent. Judging from the efforts made to frighten the public out when the market becomes strong and commission houses begin to buy, the large operators do not desire "company" on the bull side at present prices. When money becomes easier and the public takes hold, quotations will no doubt be much higher.
